

## **Visual Enterprise (VE) Viewer 8.0 – No ECAD**

VE Viewer 8.0 is now available on Service MarketPlace. This version of the viewer does not have a compatible ECAD module available yet. Availability of a compatible ECAD module (Visual Enterprise ECAD) is planned for the first half of 2014.

In the meantime, VE Viewer 8.0 can be used with SAP ME for viewing work instructions and in Visual Test and Repair (VTR) for 3D solid models. It **cannot** be used with VTR for ECAD models until the compatible ECAD module is available.
