Welcome to the SAP ERP Materials Management main WIKI page!

SAP ERP Materials Management is a part of SAP Logistics functionality. The SAP Logistics function incorporate a number of distinct areas that together follow the movement of materials from manufacturer to consumer. Logistics is the management of business operations, including the acquisition, storage, transportation, and delivery of goods along the supply chain. Materials Management contains many aspects of SAP functionality, including purchasing, goods receiving, material storage, inventory, and invoicing.

Troubleshooting Guides

SAP ERP MM Troubleshooting Guide provides step-by-step solutions to common issues related to the SAP Material Management, as well as technical information about troubleshooting tools.
