Welcome to the Web Services ABAP wiki space!

This is the starting point for topics around ABAP Web services based on SAP NetWeaver 7.0 EHP 2, SP 8 (SAP_BASIS 7.02). In this space, you find conceptual articles, how-to guides, a glossary, and useful links to further SAP documentation.

SAP NetWeaver implements the basic standards for Web Services: eXtensible Markup Language (XML), Simple Object Access Protocol (SOAP), Web Service Definition Language (WSDL). For more information, refer to Supported Standards.

Note that we are continuously adding content to this wiki to cover more topics around ABAP Web services. Also, a collection of FAQs are to come soon!
