How to maintain shifts for work center

This Wiki page presents how to maintain shifts for a work center.

In Customizing Transaction OP4A Maintain a Grouping for Shift Definitions and Shift Sequences

Create the break schedule.

Maintain the shifts.
Assign the break schedule to the shift.
Create shift sequences.
Assign the shifts to the shift sequence:

In the Work center (Transaction CR02) Capacity header assign the grouping:
In Intervals and Shifts set in the shifts:
It is important to maintain the Active version. If the active version is not maintained then the Intervals and Shifts data will not be considered but the standard available capacity will be considered.
