Component Based Message Alerting (CBMA)

Is the CBMA enabled in the system?

Yes

No - in that case if needed enable it in the below mentioned places.

When you want to use the new component-based message alerting, check if the corresponding parameters (ALERTING_TARGET or alerting_target) are set on each involved runtime engines (ABAP Integration Engines, Central Adapter Engine and Non-Central Adapter Engine):

- Checking the parameter on Integration Engine
- Checking the parameter on Advanced Adapter Engine
