Welcome to the SAP Product Lifecycle Management (SAP PLM) Wiki. Feel free to create new entries or add to existing ones.

The SAP Product Lifecycle Management (SAP PLM) application provides you with a 360-degree-support for all product-related processes - from the first product idea, through manufacturing to product service. SAP PLM is part of the SAP Business Suite, which gives organizations the unique ability to perform their essential business processes with modular software that is designed to work with other SAP and non-SAP software. Organizations and departments in all sectors can deploy SAP Business Suite software to address specific business challenges on their own timelines and without costly upgrades.
