Welcome to the SAP PowerBuilder WIKI Space. This is the SCN WIKI starting point for topics around PowerBuilder.

SAP PowerBuilder is a popular rapid application development (RAD) tool for building object-oriented client/server and web applications. It currently ships with two Integrated Development Environments (IDE), one which deploys to win32/win64 and the other which deploys to .NET. Its strengths lies in its proprietary DataWindow technology allowing for easy creation, display and editing of database data. It also has open access to most popular database management systems (DBMS).

In this WIKI Space, you will find information about the basic PowerBuilder functionalities, as well as specifics on PowerBuilder Classic and PowerBuilder .NET.
